

CHECKLIST | PERSONAL DATA BREACHES UNDER THE GDPR

Presented by Crendon Insurance Brokers Ltd

The General Data Protection Regulation (GDPR) introduces a duty on all organisations to report certain types of personal data breaches to the relevant supervisory authority. You must do this within 72 hours of becoming aware of the breach, where feasible.

A personal data breach refers to a breach of security leading to the destruction, loss, alteration, unauthorised disclosure of, or access to, personal data.

In 2017, 46 per cent of all UK organisations experienced at least one cyber-security breach or attack, according to the government's cyber-security breaches survey.

If the breach is likely to result in a high risk of adversely affecting individuals' rights and freedoms, you must inform those individuals without undue delay. You should ensure that you have robust breach detection, investigation and internal reporting procedures in place. This will facilitate decision-making about whether or not you need to notify the relevant supervisory authority and the affected individuals. You must also keep a record of any personal data breaches, regardless of whether you are required to notify.

Under the GDPR, an organisation may be fined up to €20 million (roughly £16 million) or 4 per cent of its annual turnover—whichever is higher—for violating the basic principles related to data security. What's more, if your organisation fails to notify the relevant supervisory authority of a breach, it can result in a fine of up to €10 million or 2 per cent of your annual turnover, depending on which is higher.

Use this checklist to comply with the GDPR's rules surrounding personal data breaches:
